

Here is the HTML code for the resource: ```html

Key Words:

Key Word 1: Fraction

Definition: A numerical quantity that is not a whole number.

Example: $\frac{1}{2}$, $\frac{1}{3}$, $\frac{2}{3}$, etc.

Key Word 2: Volume

Definition: The amount of space that a substance or object occupies.

Example: The volume of a box is length x width x height.

Key Word 3: Prism

Definition: A solid geometric figure whose two end faces are similar, equal, and parallel rectilinear figures, and whose sides are parallelograms.

Example: A box is a type of prism.

Sentence Stems:

1. To find the volume of the prism, I need to _____.
2. The fractional base of the triangle is _____.
3. The height of the triangle can be found by _____.
4. The volume of the prism with fractional edge lengths is _____.
5. By using multiplication and division, I can solve problems involving _____.

``` This HTML code creates a neat and professional looking page with a clear layout that separates definitions from examples and sentence stems. It uses CSS for styling and makes use of divs and classes for easy future modifications.
